

About Me: Peyton Otey

Who Am I?

My name is Peyton Otey and I am attending UNR as an Accounting & Information Systems major. I'm not sure of the exact career path I will take whether it be more within accounting as I am pursuing a CPA or if I am wanting to go into the more technical side and use my IS degree.

I'd say when it comes to computers and software I feel as if I'm very efficient. I have been around computers nearly my whole life and have gained interest in building them as I was growing up and I would consider myself to be very tech-savy.

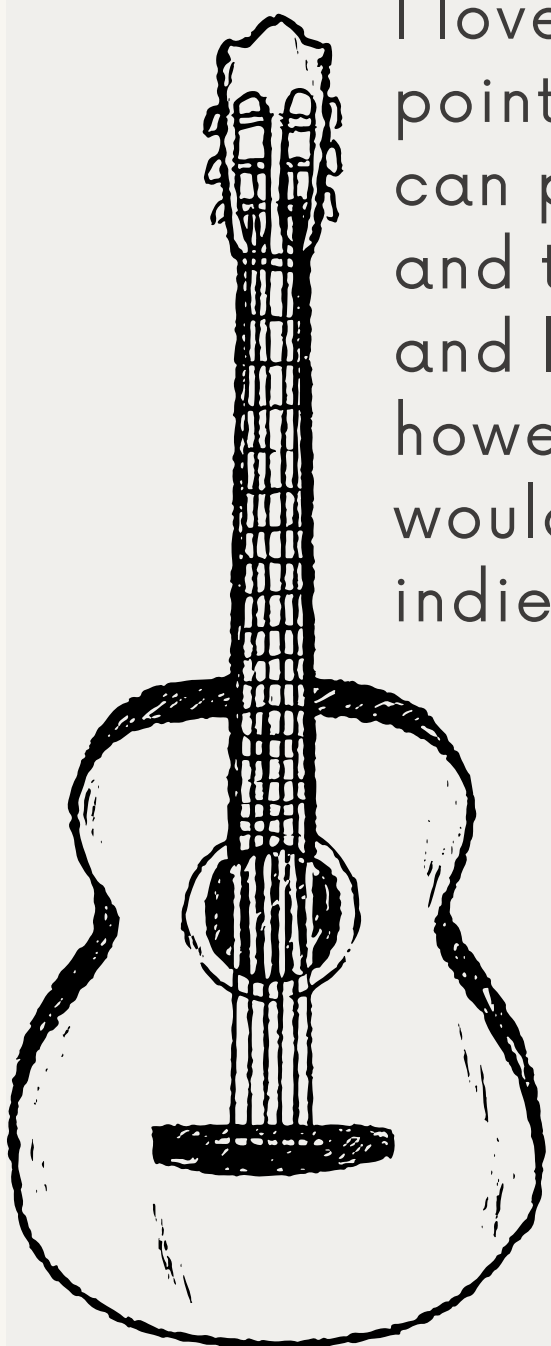

Things to know about me:

Hometown is Las Vegas, Nevada

I chose to come to UNR because it was somewhat close to my hometown being only around a 7 hour drive and 1 hour flight for when I want or need to go back. It was also in state and seemed to be a much nicer school than UNLV.

I love music so much to the point I learned 3 instruments... I can play the guitar, ukelele, and the piano. I love to learn and listen to all types of music however I would say my top tier would be alternative rock, indie.

I also love to watch movies. My favorite type would be probably action movies, mainly the ones based off of Marvel and DC comics. Marvel is just better though...

Somethings that I enjoy and am really passionate about for the future is the stock market and learning how to invest my money. A dream of mine is to someday be able to make good sufficient money through only trading stocks. Also yes I know finance would be more fit for wanting to learn investments and stocks but I just enjoy the accounting and IS side of things.

I also really enjoy spending time with friends whether it be just hanging out together or playing some sorta game like card games/board games or even a good match of mario kart with everyone together.
